Definitions of **video conferencing** on the Web:

- live video and audio communication between three or more locations.
www.geocities.com/Athens/2405/glossary.html
- Communicate in real time with two or more people at different locations via video.
www.bu.edu/webcentral/learning/av/glossary.html
- Real-time, usually two-way transmission of digitized video images between two or more locations.
www.acponline.org/computer/telemedicine/glossary.htm
- in which conferences and/or consultations between the patient, the "presenter" (normally the primary care physician), and the consulting specialist are held live over distances via a range of telecom services (usually ISDN or a suitable T1 or frame relay network); and
www.cttconline.org/terms.html
- Involves using video and audio signals to link participants at different and locations for a specific purpose.
atc.utmb.edu/glossary.htm
- Virtual machine
www.high-density.com/glossary/glossary-v.htm
- Remote conferencing to one or more specific sites with the ability to send and receive both vision and audio, live.
www.qeiicc.co.uk/organising_an_event/av/glossary
- Medium (or mode) for delivery of a course. Instruction is delivered via live video-conferencing capabilities. This mode allows for two-way communication.
www.mnvu.org/mnvu/265.jsp
- Video conferencing is a way of communicating from separate geographic locations in which the participants are able to see and hear each other in real time. Its technology enables the transfer of audio and video to multiple locations, and—with the use of a whiteboard—the transfer of graphics and data, as well. While it holds great promise for business applications, teachers, librarians, physicians, and students for distance learning and telemedicine most often use video conferencing today.
youth.itskillshub.com.au/starting_out/definitions/
- Face to face communication to discuss a need, problem or a plan using a variety of technologies in which people in different locations use video and audio devices to communicate in real-time (synchronous).
eec.lboro.ac.uk/learningtech/stoz.htm
- involves two or more parties in different locations engaging in communication via video transmission.
www.tecc.com.au/tecc/guide/glossary.asp

- Allows participants to hold a conference from their remote desktop computers. Videoconferencing introduces new requirements to the ordinary transfer of video information. First, there is a requirement for guaranteed latency because to sustain a moving image, the next frame of information must get to the other end to avoid image freeze. In practice, the image information is highly compressed and the effects of delayed information in a video sequence is less than the effect on voice. A second requirements is synchronization. Videoconferencing includes voice and other media such as electronic chalkboard. It is important that the sound replay matches the
www.imcc-online.org/GLOSSARIES/glossary.htm
- The technology which enables a number of people to partake in a conference without leaving their offices through the use of microphones, cameras and displays.
www.cs.bris.ac.uk/Teaching/Resources/COMS11200/techno.html
- Communication across long distances with video and audio contact, that may also include graphics and data exchange. Digital video transmission systems typically consist of a camera, codec (coder-decoder), network access equipment, network and audio system.
www.jkcit.co.uk/video-conferencing-terminology.htm
- Using a computer, video camera, and network such as the Internet, to conduct a live conference between two or more people. Video conferencing is an extremely useful method of communication because it saves people the time and expense of travel and can often accomplish many of the things a physical meeting can. A two-person videoconference is known as point-to-point, while more than two people involved in a session is a multipoint conference.
www.scotsmist.co.uk/glossary_v.html
- Videoconferencing allows you to have face-to-face conversations with other people on a network, whether they are around the corner or on the other side of the country.
krm.co.za/Other/KMGlossay.htm
- The ability to connect several sites together with image and voice transmission.
arkedu.state.ar.us/ade-guide/glossary5.html
- The video audio and data communication between two parties by means of the use of a video codec.
www.metrodata.co.uk/technical_services/glossaries/videoglossary.htm
- A video teleconference (also known as a videoconference) is a meeting among persons where both telephony and closed circuit television technologies are utilized simultaneously. Video teleconference communication is multi-way and synchronous, as it would be if all parties were in the same room.
en.wikipedia.org/wiki/Video_conferencing
